

**Consultation:**

Begin with a 3D scan and photos of your current smile.

**Personalized Treatment:**

Your doctor will create a digital treatment plan for your new smile.

**Clear Aligners:**

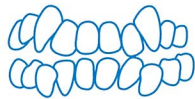

Watch your smile transform with 22-hour daily aligner wear, removing only for brushing, eating, and drinking. Replace aligners as advised by your doctor.

**Maintain Your Smile:**

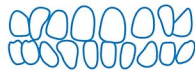

Connect with your doctor for ongoing care to keep your Angel Aligner smile healthy.

ARE ANGEL ALIGNERS RIGHT FOR ME?

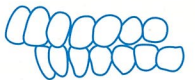

Angel Aligners are clinically proven to treat minor to complex malocclusions including:

**Crowding:**

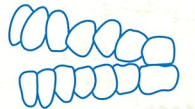

Insufficient space in the jaw, causing overlapping or rotated teeth.

**Crossbite:**

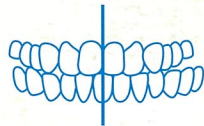

Misalignment of the upper and lower jaw.

**Openbite:**

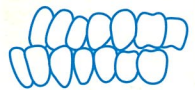

Lack of contact between upper and lower teeth when the jaw is closed.

**Overbite:**

Upper front teeth protrude outwards and overlap bottom teeth.

**Spacing:**

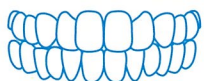

Gaps or extra space between teeth.

**Underbite:**

Lower front teeth or jaw sit ahead of the upper front teeth or jaw.

**Deepbite:**

Upper front teeth excessively overlap the bottom front teeth when your mouth is closed.

**Why Angel Aligners?**

Straighter teeth can prevent dental problems like wear, decay, gum disease, and chewing issues, and can lead to a healthier smile.

SMILE WITH ANGEL

SUPREME
DENTAL
CONCEPTS

**+20 YEARS
OF INNOVATION
AND ONE
MILLION SMILES**

Developed with orthodontists, Angel Aligners are created from transparent, BPA-free plastic material.

They offer a discreet and comfortable option to straighten your teeth while promoting excellent oral health through regular brushing and flossing.

Each aligner is meticulously tailored to fit your teeth, for a comfortable and precise fit and effective tooth movement.
